Leave Microsoft alone already! They have made concessions to the cry babies both to their competitors and with the state legislators. Let's grow up and stop crying sour grapes that Microsoft and Bill Gates have produced better software than their peers and that the consume wins. Were it not for Microsoft, this would be typed on an old electric typewriter on onion skin paper and stuffed in an envelope sent postage paid through the mail and probably given the US Post office would never be delivered anyway thus stopping the consumers, public, and voters by the way from expressing their opinions under the first amendment, which by the way you can find using Microsoft explorer the defamed browser. Thanks again Bill (Gates not Clinton) for all the great work. Keep it up and keep the US moving forward!
